

## Connected, intelligent, fast, and cost-efficient supply chain

### Problem

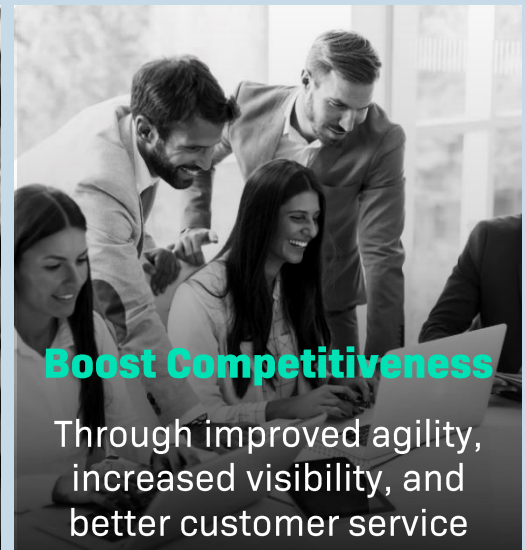

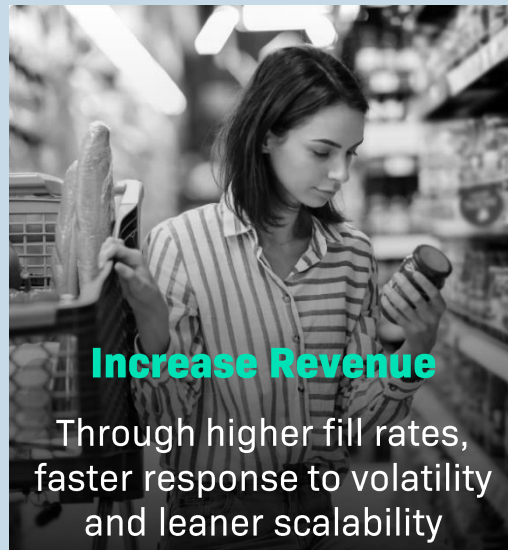

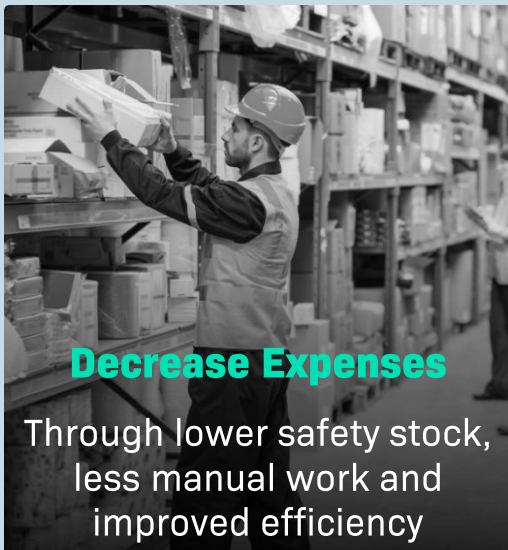

Supply chain operations are complex, labor-intensive and prone to bottlenecks and frictions. This is mainly due to the large volume of data that must be manually exchanged and processed on-time with countless trading partners.

### Solution

Process Share is a unified supply chain integration and collaboration solution that seamlessly automates the exchange and intelligent processing of data between internal systems and with external partners. The end-results are frictionless, faster and more effective processes that drive higher margins and more market share.

### Benefits

Drop us now an email at [info@processshare.com](mailto:info@processshare.com), and let's work together to optimize your supply chain operations and uncover untapped growth opportunities.

# Use Cases

## Cross Application Interoperability

Reduce data entry, automate data exchange and integrate processes, in no-time, across new or existing internally used applications

## Demand-Side Collaboration

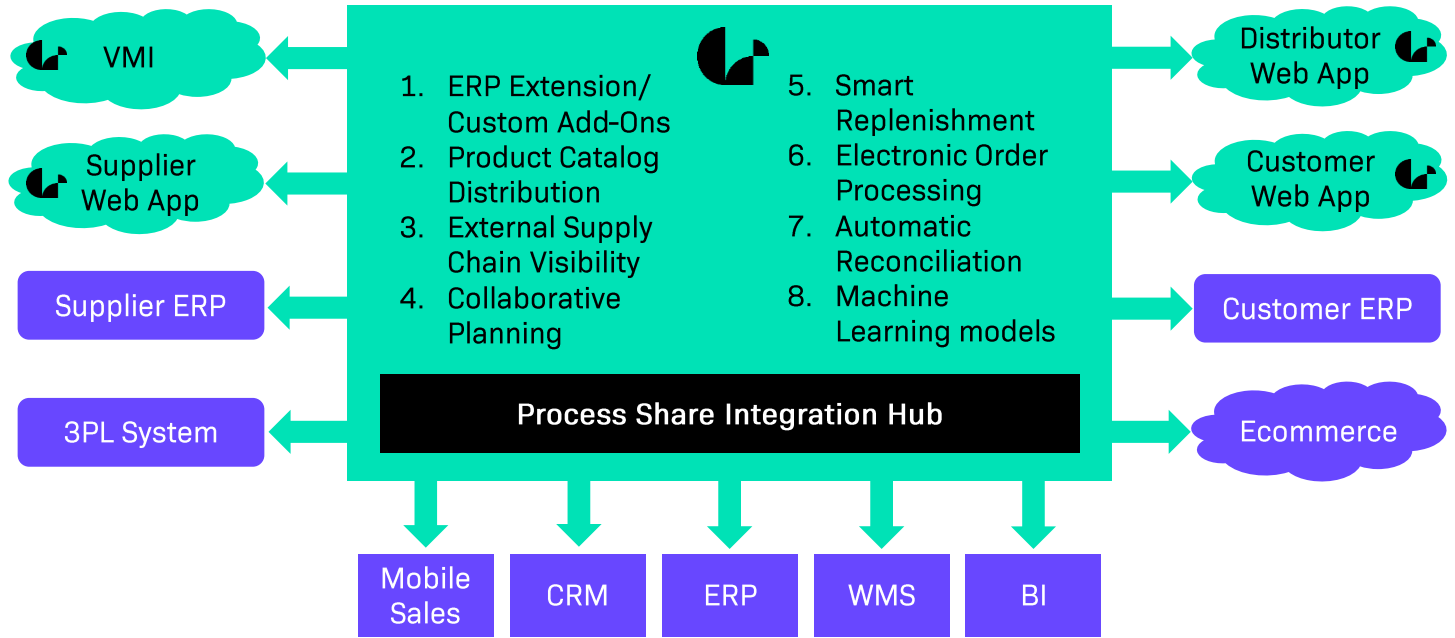

Gain real time visibility into demand trends and collaborate with all channels to deliver the right goods, to the right places, on-time, in full

## Supply-Side Collaboration

Operate connected with suppliers and logistics providers to optimize inventory levels and streamline order planning and execution

## Smart B2B Process Automation

Automate error-prone and time-consuming B2B activities such as catalog distribution, planning, replenishment and reconciliation

# Differentiators

## INCLUSIVE

For all supply chain processes across any channel

## ACCESSIBLE

Even with limited resources and outdated solutions

## SEAMLESS

Fast adoption without systems or data adaptation

## RESILIENT

Designed for reliability, agility and scalability

*With Process Share we were able to instantly track any price difference between customer PO and our price, enhance accounts reconciliation, improve our service levels and increase Sales Rep productivity.*

Adel Hosseneddine, Sales Director, Food & Drug Corporation

Process Share modular design, usage-based pricing and swift adoption makes it a quick fix for your urgent and future supply chain challenges with best-in-class ROI.
